

REAL ENERGY PROTECTION

First to offer Cancel Anytime programs to small volume customers in Ontario

Real Energy Protection

Any time

Any weather

Any place

Ontario Wholesale Energy

DON'T BE MISLED Get 100% Real Energy Protection

Annual weather patterns such as warmer winters (less commodity used), a polar vortex (more commodity used) or unusual summer weather patterns can affect your supply requirements and in many cases, result in penalties or cost adjustments to your account. Your utility reconciles your account annually; many utilities do likewise.

At Ontario Wholesale Energy, all of our products are protected - 100% Load Following, which simply means you can use as much or as little energy commodity* as you need and we absorb and manage all risk. No penalties. No cost adjustments.

NATURAL GAS

Natural gas prices have dipped from its 2014 upward trend as record production increased from the North American fracking boom.

Electricity

[See More Detail](#)

Electricity Prices continue to rise with price increases mandated in Ontario over the next 3-5 years, above previous increases.
